Factor System

# GLOBAL SOLUTION NETWORKS

Are the world's problems just too tough to solve? Or can we leverage new models, making the impossible...POSSIBLE?

GSNs are the new model for global problem solving.

## OUR MISSION:

- To **fill the knowledge gap** surrounding multi-stakeholder networks for global problem solving
- To put **GSN tools in the hands of people working to solve global problems**
- To **connect the people and networks** working to address common global issues

# GSN 1.0: Filling the Knowledge Gap

## What is a GSN?

- ✓ Addresses a global problem
- ✓ Engages diverse stakeholders
- ✓ Exploits the digital revolution
- ✓ Self-organizes and Self-governs

## How are GSNs categorized?

## What does the GSN research tell us?

# Tools for Implementing a GSN

Putting GSN TOOLS in the hands of people working to solve global problems.

*The GSN LEARNING EXPERIENCE introduces the GSN model and helps you apply the concepts to your work.*
